WHO WE ARE

LogicSource helps clients buy better. All companies buy a substantial amount of goods and services to be in business, but few do it well. Leading companies turn to LogicSource for total sourcing solutions that actually work. We employ a fully transparent, investment-based business model that ensures our clients don't

spend a dime on fees until they see results. By assembling proven, pre-built assets, including our world-class supplier ecosystem, sourcing and procurement operations center (SPOC), and leading OneMarket® technology, we execute rapidly deployable, customized solutions that work.

WHAT MAKES US DIFFERENT

Our difference is defined by our unique business model and our core values:

WE INVEST IN YOU.

We typically invest \$250K-\$500K upfront to gain insights into a clients' challenges and how to meet them. And we don't get paid a dime of fees until after we deliver results.

WE DO MORE THAN TALK.

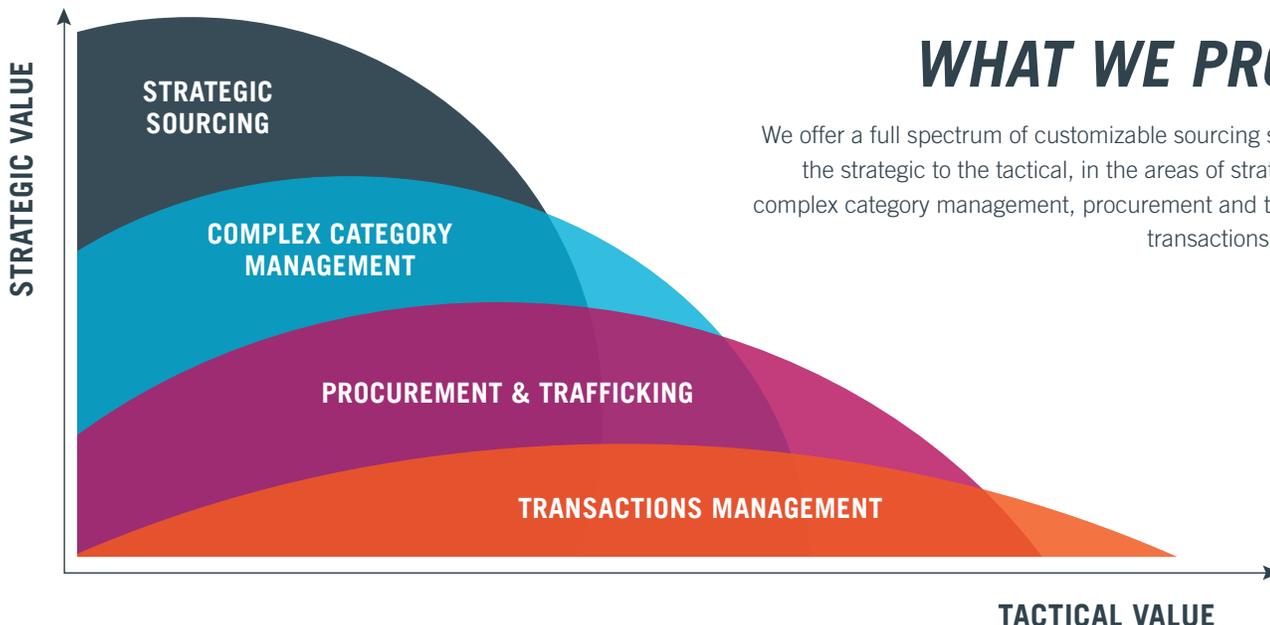

As an execution-based firm, we put plans into action. And because we execute, we're accountable. So our strategic insights and solutions have to do more than look good on paper.

WE HAVE SOLUTIONS READY AND WAITING.

We've already built the assets. And we know they work, because we've fully vetted them with clients like you. We'll configure them to your needs, systems and processes – and we'll do it fast.

WE HIDE NOTHING.

Transparency and Control means knowing exactly what your company is buying and how much you're spending. We don't believe in separating you from your suppliers or eroding your visibility into any aspect of the buying process.

WHAT WE PROVIDE

We offer a full spectrum of customizable sourcing solutions, from the strategic to the tactical, in the areas of strategic sourcing, complex category management, procurement and trafficking, and transactions management.

OUR RESULTS

They speak for themselves.

OUR HISTORY

LogicSource was founded in 2009 and is owned and operated by an experienced group of global business veterans who came together under the common goal to radically change the way sourcing and procurement works.

We know that better buying requires more than advice – it requires execution, assets and transparency. We also determined that real solutions to complex problems simply cannot be found without an upfront financial commitment. Our investment-based business model is unique in the industry and sets us apart as the firm willing to put our own money on the line for our clients' success.

We've reinvented sourcing and procurement with an execution-based, fully transparent business model that ensures clients don't spend a dime until they see results. By assembling proven, pre-built assets, including our world-class supplier ecosystem, sourcing and procurement operations center (SPOC), and leading OneMarket® technology, we execute rapidly deployable, custom- ized solutions that deliver immediate savings and sustainable value.

The result? Our clients buy better.
